

VMZINC® colours made to order

Define the VMZINC® best suited to your project !

Benefits

- A brand new offer of customised colours for an exclusive building
- A variety of elegant colours in the PIGMENTO® range. Countless shades for VMZINC® lacquered products
- Easy, standardised management of your colour
- Exclusive, 100% VMZINC® industrial manufacturing
- A specific response to the environment of your project: a large number of systems and thicknesses are available
- 40 years of VMZINC® know-how in the treatment of surface aspects.

Colour creation process

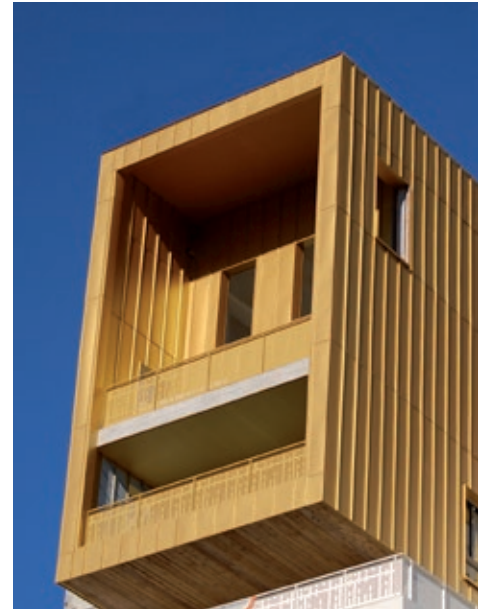

- Creation of a new colour is possible for projects with a minimum of 3 tons (in the same thickness : 0.70 -0.80 – 1.00 – 1.50 mm), i.e. between 300 and 500 m², according to the system and application used
- Shades can be chosen based on a defined colour, or based on colours already produced
- Prototypes of the colour requested will be provided within 3 weeks. The time frame for availability of rolled zinc in a new shade is approximately 5 weeks (ex-works in standard packaging, 6 weeks with seaworthy packaging, excluding plant closures)

Applications

- All types of buildings
- For new buildings and renovations
- All VMZINC® systems

Quality

A pioneer in the treatment of surface aspects, VMZINC® is using its know-how to develop a made to order colour for rolled copper-titanium zinc that complies with European standard EN 988 and the PREMIUMZINC quality label.

Housing Familles passion, La Valette-du-Var (83)
Architect : Carta Associés - Installier : Invidia Concept S.A.S
Aspect : Laqué or éclatant

If you have a project and are interested in a customised colour, contact the sales manager for your region.
